

RFline was established in 2009.

We offer:

- R&D concerned on microwave and RF antennas and other passive circuits like power dividers, filters, multiplexers etc.. We work from conception to final product supporting also manufacturing.
- our experience enabled us to create products that allowed our customers to rise their competitiveness in quality and costs aspects.
- we introduce companies to Polish and Baltic States markets,
- we have our own solutions like:
 - dually polarized antenna feeder with very high isolation between polarizations ($I > 50$ dB) working in 5.X GHz band **submitted in Patent Office**
 - omnidirectional antenna for 5GHz 10 dB Gain with 3deg squint of main beam in elevation for better coverage
 - bushings for coaxial cables - **now \square protected with Patent Office.**
 - set of antennas for 3.4-3.8 GHz
 - Cassegrain antennas for 10-11GHz
 - UWB spiral antennas.

- we are distributing connectors, adapters, coaxial cables, attenuators, power dividers, terminations and other passive circuits as agent of Jyebao and ferrite devices (isolators and circulators) from Aerotek.

We are looking for new \square business \square oportunities \square in distributing hi-tech products in area of professional electronics and telecommunications.
