

RFline was established in 2009. Main area of activity is RF and microwave area including - trade, R&D, consultancy

We offer:

- R&D concerned on microwave and RF antennas and other passive circuits like power dividers, filters, multiplexers etc.. We work from conception to final product supporting also manufacturing.
- our experience enabled us to create products that allowed our customers to rise their competitiveness in quality and costs aspects.
- we introduce companies to Polish and Baltic States markets
- we have our own solutions like dualy polarized antenna feeder with very high isolation between polarizations ($I > 40$ dB) working in 5.X GHz band or omnidirectional antenna for 5GHz 10 dB Gain with 3deg squint of main beam in elevation for better coverage or bushings for coaxial cables
- we are distributing connectors, adapters, coaxial cables, attenuators, power dividers, terminations and other passive circuits as agent of Jyebao
